

Aqua+ 7 STAGES π ENERGY WATER SYSTEM

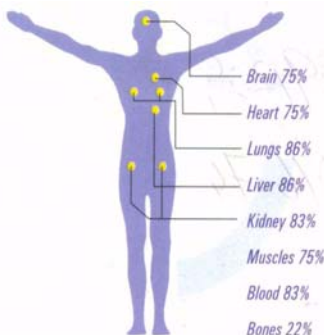

Filter Cartridge

1. Doulton Supercarb
2. Sediment
3. Softener Resin
4. Pre Carbon
5. Far Infrared Bio Ceramic
6. Crystal Bio π Energy
7. Silver Post Carbon

Main Function

- Small molecular water cluster for better absorption & metabolism, reduce tiredness and increase endurance.
- Promote growth of children, enhance nutrients absorption and strengthen bone
- Dissolved oxygen could be enhanced to activate cells even more and help to prevent cancer.
- Intensify the metabolism, improve physique and improve liver and kidney function
- Improves skin complexion, maintains healthy skin and long life.
- Economic, nutritious and health.

The Importance of Water:-

The Human body is made up of More Than 70% Water.

Website for reference:-

Easy to maintain.
 Filters are exchanged periodically.
 Cartridges are depend on water quality and consumption usage.
 7 days refundable.
 Gross Weight : 7.5kgs
 Dimension : 24cm x 34cm x 40cm

Aqua+ 7 STAGES π ENERGY WATER SYSTEM

1st Filter : Doulton Supercarb

■ The absolutely dense distribution of pores measuring **0.5-0.8 micron in pore size** ensures that **99.99% of the residues and bacteria are filtered off**, the silver elements as a component in the filter automatically **sanitizes the water**, so that **no boiling is necessary**.

Capacity: 10,000 Liters.

Life Span: Up to 12 months.

2nd Filter: Sediment

■ Using bacterium resistance technology to high tech energy exchange application to enhance **bacterium resistance capacity and prevent the growth of pathogen and fungus**. Filter impurities of larger micron like hair, sand microbial, rust, algae etc swiftly divides the larger particles from smaller ones.

Capacity: 10,000 Liters.

Life Span: Up to 12 months.

3rd Filter: Softener Resin

(According with International Safety Standard)

■ Enhanced the **removal of chlorine**, organic chemicals, pesticides, germ and parasites remaining residue inside the water, prevent bacteria growth on. **Soften the water.**

Capacity: 20,000 Liters.

Life Span: Up to 24 months.

4th Filter: Pre Carbon

■ Provides **anti-bacteria effect**. Enhanced reduction of taste, odor, colour, insecticide, chlorine, rust, synthetic detergents and etc.

Capacity: 20,000 Liters.

Life Span: Up to 24 months.

5th Filter: Far Infrared Bio Ceramic

■ Extracted from various minerals, it contains **FAR-INFRA-RED** elements which releases physical rays and resonance effect. **Increase the content of oxygen and water mobility**. This will improve body metabolism and **strengthens immune system**. It also enable the body to **meet energy treatment and body activation and help to improve in healthcare, beauty care and longevity**.

Capacity: 30,000 Liters.

Life Span: Up to 36 months.

6th Filter: Crystal Bio π Energy

■ Releases energy into water, breaks down water molecules cluster. **Stabilize water molecules, boosts energy to higher level. Adjust water to an optimum alkaline level and increases calcium ions**. Energize the water, the energy produced here "**softest**" and closest to human Aura, "**Harmonize**" other energies like, FAR INFRA RED Energy, Magnetic Force so that can be accepted by Auric field and do not cause any disruption or puncturing allowing unwanted negative force to enter out Auric Field.

Capacity: 30,000 Liters.

Life Span: Up to 36 months.

7th Filter: Silver Post Carbon

■ Removes objectionable tastes, odours, color from treated municipally-supplied tap water. **Prohibits the growth of bacteria within the filter media bed.**

Capacity: 10,000 Liters.

Life Span: Up to 12 months.

Today water are contaminated by industrial pollutants, garbage, heavy metals, polluted rivers etc...

Estimation of life span is based on family of five member.
